Using Apogee Preflight action lists

- 1. Using an Apogee Preflight action list [ESSENTIAL]
 - 1. Open <u>"White Text in Overprint.pdf"</u>. Verify with the Acrobat Tool\Print Production\Output Preview whether you see any text. Toggle "Simulate Overprinting" ON and OFF.

2. Close the file.

Additional Action List Information

Action List Categories

3. Open the <u>"Apogee Preflight-Exercise 01 - Action list.ajt"</u> job ticket. Go to Plan tab>Apogee Preflight: Select the Overprint category; select <On> in the State column.

The Action Lists that are enabled are now visualized on the right hand side.

A short description is shown below the name of the Action List (only during editing a job).

The Category is also highlighted in which the selected Action List is located.

pening Apogee Preflight Results

In Acrobat you now see the white text, also when "Simulate Overprinting" is selected. It was 0% spot color text in overprint in the original file; therefore you could not see it. Apogee Preflight set it to Knockout.

6. Close the file.

Exercise1-1 (set Notify for Fixes):

- 1. Edit the job of previous exercise and change Apogee Preflight settings. Check < When Preflight applies fixes: Notify>.
- 2. Submit your changes and check the new behavior in the JobList.
